EDUCATION

Indian Institute of Technology (IIT) Guwahati

Guwahati, INDIA

Bachelor of Science in Data Science and Artificial Intelligence

EXPERIENCE

Software Engineer Intern

Oct 2025 – Mar 2026

SuperAGI Inc

Bengaluru, INDIA

- Engineered **AI-driven dynamic templating system** with contextual runtime resolution, powering **5,000+ LinkedIn automation actions/month** and improving lead conversion by **40%**.
- Designed distributed background job processing with retry strategies and idempotent workers supporting **500+ DAUs**.
- Automated domain and mailbox provisioning via Infraforge APIs, decreasing campaign setup time by **30%** and enabling **700+ AI SDR campaigns/month**.

Software Engineer Intern

Dec 2024 – Feb 2025

Wolf Pixel Ltd

Remote

- Built scalable frontend applications using **React.js + TypeScript**, integrated with **Node.js/Express REST APIs** with strong API contract enforcement.
- Optimized API consumption and client-side state management, reducing load latency by **25%**.

PROJECTS

Interview.io — Assessment Platform for Technical Hiring

Tech: React.js, Redux, Node.js, REST APIs, OpenAI API

- Developed AI-driven interview automation system with resume parsing, dynamic Q&A generation, and automated candidate scoring using LLM APIs.
- Reduced manual interviewer review effort by **70%** through automated evaluation workflows.

Plixa — Real Time Collaborative Platform

Tech: WebRTC, Socket.io, JavaScript, Node.js

- Engineered real-time collaborative board with synchronized state updates and live video communication using WebRTC and Socket.io.
- Designed low-latency bi-directional communication channels supporting concurrent users.

Swift Invoice — Modern Invoice Software for Freelancers

Tech: MongoDB, Express.js, React.js, Node.js

- Developed full-stack MERN application for dynamic PDF invoice generation with QR-based payments.
- Implemented backend validation and transactional data handling to ensure payment integrity.

Altresume — Custom Resume for Every Job Application

Tech: WebRTC, Socket.io, JavaScript, Node.js

- Engineered real-time collaborative board with synchronized state updates and live video communication using WebRTC and Socket.io.
- Designed low-latency bi-directional communication channels supporting concurrent users.

TECHNICAL SKILLS

Full Stack Development Skills: Python, JavaScript, React.js, Next.js, Node.js, Express.js, Django

Databases: PostgreSQL, MongoDB, Redis
